

PREPARED FOR

Maya Medi Spa

Twenty-five thousand people found this page on their own. One of them wrote in.

We sent the Indiranagar number a WhatsApp enquiry on Saturday evening. What was still true by Monday says less about that message, and more about the system behind it.

OBSERVED – WHATSAPP ENQUIRY, INDIRANAGAR NUMBER

SAT 15 AUG Sent to the WhatsApp number on Maya's own Google Business Profile, asking about hair fall and thinning.
6:24 PM

NO ACKNOWLEDGEMENT AT ANY POINT – AUTOMATED OR HUMAN
MON 17 AUG Still nothing. Unanswered through Sunday and Monday, both inside the clinic's own published hours (9 AM–8:30 PM daily) – about twenty-five open hours.
EVENING

A real message sent to the number the clinic's own Google listing gives – not a guess.

One test can't say whether Saturday was unusual. What it does say: right now, nothing on this number tells anyone at Maya – not even the owner – whether a message arrived at all.

WHY THIS MATTERS

Maya runs no paid ads on Meta or Google – this enquiry was earned, not bought. Whoever wrote in had already chosen the clinic by name. A gap like this leaves no trace: nothing ever lists them as missed.

CONFIRMED FROM OUTSIDE

- ✓ 25,632 verified Instagram followers, 4.4★ across 243 Google reviews – earned reach, no paid ads on Meta or Google.
- ✓ The number tested is the one listed on Maya's own Google Business Profile for Indiranagar, not a guessed contact.

CAN'T CONFIRM WITHOUT YOUR DATA

- Whether this happens to other enquiries too, or Saturday was unusual.
- Whether it's the same at Maya's other locations, or Indiranagar is the exception.

WHAT WE'D CHECK FIRST, IF WE HAD ACCESS

- The last thirty days on this number – how many enquiries landed, how many got any reply.
- Whether a message can be acknowledged the instant it arrives, before anyone has seen it.

What we're not saying: this isn't about anyone being slow to care once a conversation starts. It's about the number where, on this test, nobody answered at all.

This isn't unique to Maya. The real question isn't whether one enquiry went unanswered – it's how many have, with nothing ever confirming they arrived.

You can check this yourself: scroll back on that number and count how many enquiries never got a reply. If it's worth mapping properly, we'd look at the last thirty days **at no cost to the clinic.**
